

Identification

Records identified from 5 sources
(OpenAlex, Semantic Scholar, Crossref, PubMed,
arXiv; bioRxiv-track via indexing)
n = 250 (50 per source, query Q001)

Records removed
before screening
n = 11

Screening

Records screened by 4 independent AI screeners
(12 agent-in-the-loop batches)
n = 239

Records excluded at
title/abstract
n = 181

Eligibility (trust verification)

OA full-text harvested & validated
64 PDFs; 57 included studies contribute claims
(1 empty abstract, claim-void)

Phase-4 trust streams (4)
retraction 48 (0 flagged);
COI 47; open-science 32;
risk-of-bias attestation

Included

Studies included in living review 1.0
n = 58 included / 181 excluded
510 claims (RQ1 166 / RQ2 132 / RQ3 212);
95 consensus clusters; 47 fully Phase-4 certified

Version 1.0, corpus finalized 2026-09-09. Full accounting: 250 identified – 11 duplicates = 239 screened.
