

Building a Reproducible Scholarly Search Toolkit

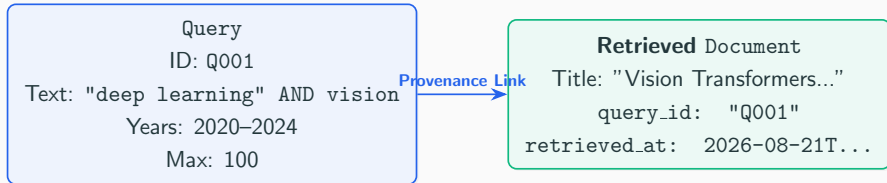

Episode 5: Query as a Research Instrument

Nexus Scholar Suite

Query as a Formal Instrument

Scientific Auditability

In reproducible research, search parameters cannot be transient command line arguments. They must be immutable, structured research objects.

The Query Dataclass

```
@dataclass
class Query:
    text: str
    id: str = "Q001"
    year_min: int | None = None
    year_max: int | None = None
    language: str = "en"
    max_results: int | None = None
```
