

Building a Reproducible Scholarly Search Toolkit

Episode 14: Crossref & Bibliographic Validation

Nexus Scholar Suite

Crossref Works & Validation

Crossref Provider Implementation

```
class CrossrefProvider(BaseProvider):  
    def validate_reference(self, citation: str) -> dict | None:  
        url = "https://api.crossref.org/works"  
        params = {"query.bibliographic": citation, "rows": 1}  
        resp = self.http.get(url, params=params).json()  
        items = resp.get("message", {}).get("items", [])  
        return items[0] if items else None
```
